COMPACTA

Compact cartoning/closing machine

A new, small solution for the packaging of bolts. This compact line includes a forming unit and closing unit in one single structure measuring just 200 x 200 cm in size. The system can reach a production of up to 7 boxes a minute and can be connected to a piece counter, weighing machine and other feeding systems.

Box size

Min. 100 x 100 x 50 mm

Max. 300 x 200 x 200 mm

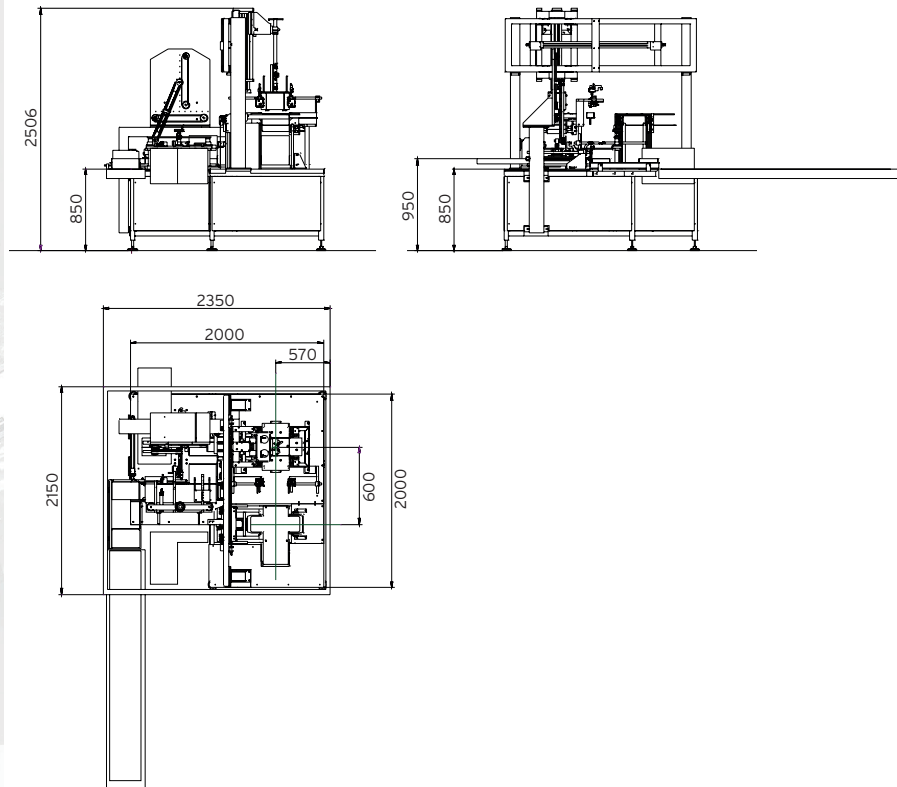

Production speed

Up to 7 boxes/min

TECHNICAL FEATURES

- Vertical holder for ascending carton blanks to keep the top section of the cartons at the same level.
- Vertical and horizontal pneumatic axes to collect the blank carton and transfer it to the forming head where the glue is applied.
- Motorised chain in two fixed positions: below the forming head and in the product loading station.
- Pneumatic cylinder to transfer the filled box to the closing area.
- Closing of the box side flaps by means of rotating pneumatic cylinders.
- Adjustable motor-driven chain to close and glue the top for boxes of different sizes, using the same glue sprayer.
- Accident prevention guards.
- Installed power: 13 kW - 400 Volt, 3-phase - 50 Hz + PE.
- Painting: RAL 9010.
- Machine built according to CE Standards.
